EDUCATION

University of California, San Diego

Bachelor of Science in Data Science

San Diego, CA

Sep. 2025 – Dec 2027

Norco College

Associate's in Mathematics

Norco, CA

Jan. 2022 – June 2025

EXPERIENCE

Coding Instructor

CodeAdvantage

Feb 2026 – Present

San Diego, CA

- Instructed K–12 students in JavaScript programming fundamentals.
- Developed and delivered interactive, project-based coding lessons.
- Mentored students in debugging, algorithmic thinking, and problem solving.

Upward Bound Mentor & Tutor

College Corps

Aug. 2024 – Aug. 2025

Norco, CA

- Analyzed performance data to identify gaps, root causes, and improvement opportunities.
- Developed tracking systems and KPI-based progress reports to improve accountability and performance visibility.
- Maintained accurate data records to support reporting and program evaluation.

Senator of Finance & Activities

Norco College

Oct. 2023 – May 2025

Norco, CA

- Managed and analyzed a \$500,000+ operating budget using structured datasets to improve financial performance, cost control, and resource allocation efficiency.
- Conducted ROI and cost-benefit analysis to support capital funding decisions and operational investments.
- Partnered cross-functionally with leadership to drive data-informed decision making and operational alignment.

PROJECTS

Tactical Viewer App | *Python, Figma, Supabase*

Feb 2026 - Mar 2026

- Developing an analytics application to model and visualize advanced soccer KPIs, including Expected Goals (xG), Expected Threat (xT), and off-ball value.
- Applying statistical modeling, probability, and spatial analysis to quantify player impact and optimize performance evaluation.
- Contributing to UI/UX planning in Figma to translate complex analytics into user-friendly tools.
- Utilizing Git for version control and collaborative development workflows.

Pulsepanion | *Python, Shiny, R*

June 2025 - July 2025

- Built end-to-end data pipelines for ingestion, transformation, and analysis of structured datasets.
- Queried relational datasets using SQL-style logic to generate performance metrics and trend analysis.
- Developed interactive dashboards to support real-time decision making and performance monitoring.
- Structured modular architecture to support system integration and future Snowflake/API connectivity

TECHNICAL SKILLS

Languages: Python, Java, C/C++, R, JavaScript, SQL

Data Science & ML: pandas, NumPy, Matplotlib, scikit-learn, Jupyter Notebook

Analytics & BI: Power BI, Excel (Pivot Tables, Power Query, XLOOKUP), KPI Reporting

Developer Tools: Git, GitHub, VS Code, Visual Studio, Jupyter, Figma

Databases: MySQL, SQLite
